Hand Protection

A. Chrome Oasis® 4030

In a heated situation, comfort should be the last thing on your mind. HexArmor® wants to keep it that way. We've added HexVent® to our most popular mechanic's glove, to provide you with the highest level of cut and impact protection on the market while making sure you aren't overheating due to your PPE. This advanced breathable technology supports our hi-vis impact-resistance system, and a layer of cut 5 SuperFabric® brand material gives you both superior safety and peace of mind. The combination of HexVent®, our standard pre-curve design, and double-stitched seams provides added dexterity and durability. Now you can focus on your work, and we'll focus on your comfort and safety

SKU	Description	Size	UOM
HEX4030	Chrome Oasis® 4030	S-3X	PR

B. Rig Lizard® Thin Lizzie™ 2090

The Rig Lizard® Thin Lizzie™ 2090 is made from a HPPE and glass fiber blend shell. It's a lightweight, form-fitting, cut-resistant glove with maximum dexterity. Like all Rig Lizard® Series gloves, the 2090 features a newly redesigned high-flex IR-X® Impact Exoskeleton™, which delivers critical back-of-hand impact protection that won't cause hand fatigue or restrict movement. This glove was built to help you perform by keeping your hands safe and comfortable all day long.

SKU	Description	Size	UOM
HEX2090	Rig Lizard® Thin Lizzie™	S-2X	PR

C. Rig Lizard® 2025

This rugged new addition to HexArmor's popular Rig Lizard® family of gloves, the 2025 is designed to give you more abrasion resistance, a stronger grip, and an extremely comfortable, high-dexterity impact protection system. With a palm made from our proprietary TP-X+® high-performance material, this glove delivers all the protection you need in a lightweight, comfortable glove. Purpose-built for hazardous mining, drilling, and oil and gas operations, the 2025 is tough, it's functional, and it's durable. Everything you need in a heavy-duty industrial safety glove, and more.

SKU	Description	Size	UOM
HEX2025	Rig Lizard glove, cut level 4, impact	S-2X	PR

D. Rig Lizard® 2021

The Rig Lizard® sets a new precedent for safety gloves. HexArmor's advanced TP-X™ technology combines the unmistakable grip advantages of a synthetic palm with the scientific innovation that made HexArmor® the thought leader in PPE development. After safety supervisors across the industry helped identify common on-site hazards, anything less than our full-hand Impact Exoskeleton™ simply would not suffice. Combine these features with a pre-curve design, double palm stitch, and HexArmor's maximum-comfort fingertip design, and you've unlocked the dexterity and protection needed for optimum performance.

SKU	Description	Size	UOM
HEX2021	Rig Lizard glove, cut level 3, impact	S-2X	PR

E. Rig Lizard® Waterproof 2029

When you asked for a glove with the highest level of dexterity without sacrificing impact protection, we listened. The Rig Lizard® sets a new precedent for safety gloves. After safety supervisors across the industry helped identify common on-site hazards, anything less than our full-hand, impact-resistant Exoskeleton™ simply would not suffice. Combine these features with a pre-curve design, double palm stitch, and our maximum-comfort fingertip design, and you've unlocked the dexterity and protection needed for optimum performance.

HEX2029	Rig Lizard Waterproof, cut level 3	S-2X	PR

A. Rig Lizard Oasis™ 2022

In the most extreme work environments, the heat can be nearly unbearable. Outdated leather protective gloves often make this situation worse. Fortunately, HexArmor® listened, and is proud to offer the Rig Lizard Oasis™ 2022. They have created a unique ventilation technology, called HexVent™; an advanced nylon mesh that supports our IR-X™ Impact Exoskeleton™, so you have the distinct advantage of a lightweight, breathable glove without sacrificing any of our industry-leading smash protection. Combining this innovation with our proprietary TP-X™ synthetic high-grip palm yields the level of safety and dexterity you require. ISEA Level 3 cut and puncture protection.

A. V-Gard® Standard Hard Caps

These MSA hard hats are the number one hard hat for most industrial applications. The shell is made with a durable injection-molded, high-density polyethylene. These MSA hard hats are available with the Fas-Trac® or Staz-On® suspension for superior head protection. In addition, this MSA cap is designed with an accessories slot to accommodate many add-on features and also includes a Cushionaire™ sweatband and adjustable crown straps. Complies with ANSI/ISEA Z89.1-2009 (Class E) standards for a Type I (top impact) helmet.

Hearing Protection

by Honeywell

A. Max® Earplugs

Workers who need to block out loud noise demand the best protection and comfort available in an earplug. That's where Max comes in. The world's most-used polyurethane earplug, Max offers superior noise-blocking performance in a single-use earplug. Max's new enhanced contoured shape is easier to insert and resists backing out of the ear canal, while its softer foam delivers superior long-wearing comfort – delivering solid performance that your workers can depend on. NRR 33. Tested in accordance with ANSI S3.19-1974. Coral color.

SKU	Description	Type	Package	UOM
HOWMAX1	Max® Earplugs	Uncorded	Polybag	200 PR/BX
HOWMAX30	Max® Earplugs	Corded	Polybag	100 PR/BX

B. Max Lite® Earplugs

Ideal for workers with smaller ear canals, Max Lite's low-pressure foam expands gently inside the ear canal for comfortable long-term wear, eliminating that feeling of "tightness." Its contoured T-shape delivers easy handling for insertion and removal. Plus, Max Lite is available with special cording, packaging and dispenser options, ideal for process industries with low tolerances for packaging waste. Attenuation tested in accordance with ANSI S3.19-1974. Green color. NRR 30 dB.

REL4000050	SkyLoc II SRL, 50' galvanized cable	EA
REL4000100	SkyLoc II SRL, 100' galvanized cable	EA

*Available August 1, 2015

Horizontal Lifeline Systems

Working at heights is inherently dangerous. While it is impossible to eliminate every risk, Reliance fall protection equipment has been designed to substantially reduce the risk of injury. Most fall related injuries are the result of faulty or abused equipment, lack of training, failure to follow the manufacturer's instructions, or simple failure to use good judgment. No manufacturer can accept the liability for damages that result from equipment that has been improperly used or abused - that remains the responsibility of the user.

Choosing fall protection equipment that effectively protects workers from hazards while remaining in compliance with government regulations can be an intimidating task. OSHA 1926.501(b)(1) states: "Each employee on a walking/working surface (horizontal and vertical surface) with an unprotected side or edge which is 6 feet (1.8M) or more above a lower level shall be protected from falling by the use of guardrail systems, safety net systems, or personal fall arrest systems".

Horizontal Lifeline Systems - Road & Bridge

Reliance offers a variety of engineered horizontal lifeline systems that are specifically designed to address the fall protection hazards associated with the construction and maintenance of roadways and bridges. These systems use components that were developed to meet the standard requirements of road and bridge work environments, and have been thoroughly field tested on actual jobsites.

Reliance Horizontal Lifeline Systems for Road and Bridge work share a common horizontal lifeline system, but use different anchor, stanchion, and other elements specific to the environment in which they are installed. On the opposite page is a breakdown of the lifeline component common to each system, along with a listing of individual components specific to the systems listed in this section. Components are called out numerically on the system illustrations.

Horizontal Lifeline Systems - Structural Steel

Structural steel systems are designed for installation on existing structures. Utilizing off the shelf components, most all structures can be accommodated. System height is 5, 6, or 7' (1.5, 1.8, 2.1m) above the walking surface or can be configured to hang from above. System stabilization is maintained with tie-back cables or strong back struts when stanchions are utilized. On structures (piperacks) where clamping on the top flange of I- beams is not feasible, under slung clamps may be used.

Horizontal Lifeline Systems - Concrete

Construction projects utilizing concrete foundations are among the most common in building sites worldwide. The nature of concrete construction projects presents a unique set of challenges for fall protection and horizontal lifeline setup and use. Reliance has extensive experience in this area, and offers a variety of systems and solutions for concrete construction projects.

Reliance has invested a great deal in engineering and Research and Development geared towards meeting the needs of our customers. Currently, Reliance offers several off the shelf systems which effectively address most concrete construction applications. Since each project has unique challenges, custom fabrication of brackets and structural interfaces are available upon request.

Horizontal Lifeline Systems - Speciality

With our large selection of off the shelf components, most any structure may be fitted with a permanent or temporary Reliance horizontal lifeline. With the ability to "tune" our lifeline systems, Reliance can accommodate clearance and span geometries that our competitors have difficulty with.

A. Reliance® T.E.S.T.S.™ Elastic Tool Lanyard

The REL799950 Elastic Tool Lanyard is designed to secure tools to a person or object to prevent inadvertent dropping. Initial length is 26" and can elongate to 42". Comes with an 80 mm carabiner and rubberized loop with a ball lock for additional anchoring/attachment options.

SKU	Description	UOM
REL799950	Elastic tool lanyard	EA

B. Reliance® T.E.S.T.S.™ Coiled Tool Lanyard

The REL799952 Coiled Tool Lanyard is designed to secure tools to a person or object to prevent inadvertent dropping. Comes with an 80 mm carabiner and rubberized loop with a ball lock for additional anchoring/attachment options. 5 lb max tool weight.

SKU	Description	UOM
REL799952	Coiled tool lanyard	EA

C. Reliance® T.E.S.T.S.™ Tool Lanyard

The REL799953 Tool Lanyard is designed to secure tools to a person or object to prevent inadvertent dropping. Initial length is 38" and can elongate to 63". Comes with 2 spring hooks for anchoring/attachment options. Up to 15 lb max tool weight.

SKU	Description	UOM
REL799953	Tool lanyard up to 15 lb max tool weight	EA

D. Reliance® T.E.S.T.S.™ Tool Lanyard

The REL799955 Tool Lanyard is designed to secure tools to a structure capable of supporting 1,000 lbs to prevent inadvertent dropping. Initial length is 38" and can elongate to 63". Comes with 2 spring hooks for anchoring/attachment options. Up to 50 lb max tool weight.

SKU	Description	UOM
REL799955	Tool lanyard up to 50 lb max tool weight	EA

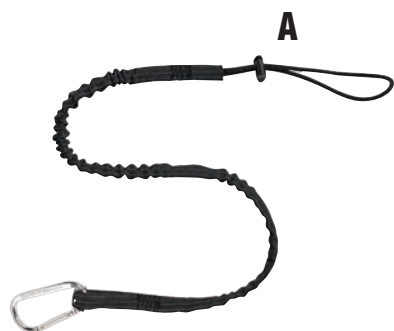

E. Reliance® Tool & Equipment Safety Tether System

Anchor rings are installed on irregular shaped tools (or tools that lack an appropriate connector slot) utilizing the REL799990 tension tool.

SKU	Description	UOM

ERG5516	Topped Tool Pouch - Strap Attachment	EA

A Hines Corporation Company

RailGuard 200 Non-Penetrating Safety Guardrail System

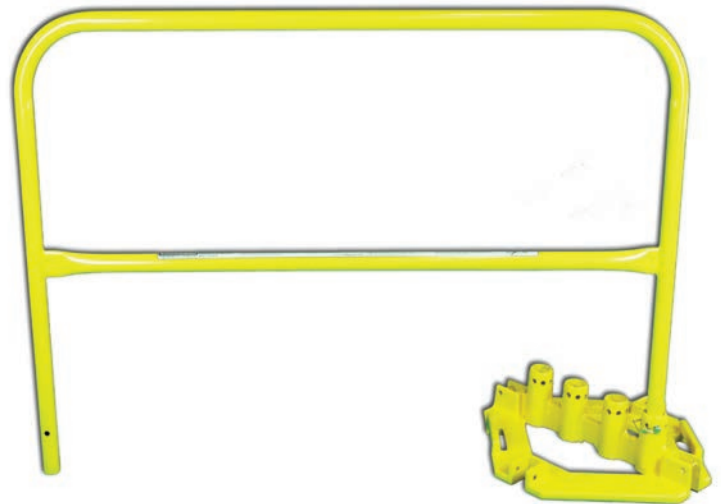

RailGuard 200 is the original non-penetrating rail system that exceeds requirements for OSHA temporary and permanent guard-rail standards. It is ideal for creating leading edge rooftop fall prevention or for defining material landing zones during active work on the jobsite.

For the ultimate in aesthetics and flexibility choose the RailGuard 200 Fit-Rite System. Fit-Rite offers custom rail lengths to be installed on-site for a permanent clean look. The rigid design offers many base mounting options and choose from either straight or curved stanchions.

Whichever System you choose RailGuard will provide safe rooftop edge fall prevention. Check out these features:

- Standard yellow powdercoat or galvanized.
- Custom colors available.
- Std base allows multiple rail angles.
- Non-Penetrating design.
- Integrated toe-board pockets and handles
- Fit-Rite system completely customizable with straight or curved stanchions.

RailGuard 200 Standard Kit
1 Rail, 1 Base, 2 Pins

Please contact customer service for more information.

VersaGate Self-Closing Gate System

VersaGate

The Garlock VersaGate safely secures unprotected openings from 24 to 48 inches on ladderways, platforms and stairs. Four standard adjustable models available depending on your opening size. Custom sizes, colors and galvanized options make the Garlock VersaGate the solution.

- Meets OSHA 1910.23(a)(2)
- Two-piece gate for adjustability to fit varying widths.
- 4 standard models and universal left/right mounting.
- Spring-loaded hinge provides self-closing feature.
- Adjustable Hinge height for universal mounting.
- Universal clamp will fit flat or round post or rail.

Please contact customer service for more information.

Heat Protection

A. Chill-Its® 6602MF Microfiber Evaporative Cooling Towel

Dampen the microfiber towel to activate cooling or use dry to wipe your brow. Microfiber material is soft and absorbent and super-evaporative, feels significantly colder than ambient air when wet. Chemical free and machine washable. 2-sided color, gray on reverse for all colors. Size: 9.8" x 40.9" (25cm x 104cm)

SKU	Description	UOM

In House Customization

Direct Embroidery

Embroider text directly on a garment. This option is most often used for names, titles, accredits, etc. and can be done easily without the need for digitization.

Reflective Tape

Adding reflective striping to your uniform can make a lifesaving difference. Select from the many trim widths, colors and placements to make your enhancements have the highest impact. These distinctive stripings can be added to most garments. Flame-resistant striping is also available. The garments and striping you select should depend on the end use requirements.

Stock Emblems

The possibilities are endless! Whether you choose from one of the emblems displayed here or supply us with your own emblems, our sewing operators can apply almost any shape emblem to your garments at time of order. There is no charge to store your emblems at our warehouse. Emblems are kept in a secured area and are applied at time of order, giving you the flexibility to decorate garments with different combinations and placements of emblems. We can also assist you with the development and procurement of new emblems. Lead time for custom emblems is 6 to 8 weeks
