OSHA[®] FactSheet

Disaster Cleanup and Recovery PPE Matrix

Workers engaged in disaster cleanup and recovery activities may be exposed to a variety of hazards. A comprehensive list of potential hazards and controls, sorted by common tasks, can be found in OSHA's Hurricane [eMatrix](#).

Specialized operations, such as electrical power restoration, hazardous materials response, or confined space entry require controls specified in the applicable OSHA standards.

- Designing a way around a hazard is always the preferred control method. For example, installing a guardrail to prevent a fall from occurring is better than relying on a safety harness and lanyard to catch the worker after a fall occurs. However, in many cases personal protective equipment (PPE) may be the only practical control method. All PPE has limitations and is the control method of last resort.
- The suggested PPE Matrix is provided to assist employers in determining the PPE needed for a specific task. Respiratory protection is addressed below the matrix.

PPE \ Task		Normal Cleanup Activities	Working in Wet Conditions	Working with Chain Saws	Working Near/Over Water	Working at Heights Over 6 ft.	Working Near Loud Noise
Head	Hard Hat	X	X	X	X	X	X
Eyes	Safety Glasses	X		X	X	X	X

	Waterproof Boots		X				
Other PPE	Workboat/Skiff				X		

Hoja de Datos

Matriz de equipo de protección personal (PPE, por sus siglas en inglés) para la limpieza de desastres

Trabajadores que están participando en actividades de limpieza y recuperación de desastres pueden estar expuestos a una variedad de peligros. Una lista completa de los potenciales peligros y controles, según las tareas comunes, se puede encontrar en el [eMatrix](#) (en inglés) de la OSHA para el huracán. Operaciones especializadas, tales como la restauración de la energía eléctrica, la respuesta a materiales peligrosos o la entrada a espacios confinados requieren controles especificados en las normas aplicables de la OSHA.

- La elaboración de un plan para evitar un peligro siempre es parte del método de control preferido. Por ejemplo, la instalación de una baranda para evitar una caída es mejor que depender de un arnés de seguridad y una cuerda de seguridad para atrapar al trabajador después de una caída. Sin embargo, en muchos casos, equipo de protección personal (PPE) puede ser el único método de control práctico. Todo PPE tiene sus limitaciones y el método de control es el último recurso.
- Se provee el Matriz PPE como sugerencia para ayudar a empleadores a determinar el tipo de PPE que se necesita para tareas específicas. El tema de protección respiratoria se cubre después de la presentación del matriz.

PPE \ Tarea		Actividades de limpieza normales	Trabajando en condiciones húmedas	Trabajando con sierras de cadena	Trabajando cerca de/ sobre agua	Trabajando en alturas de más de 6 pies	Trabajando cerca de ruidos fuertes

RADGGP111ID	Goggles, Perforated Side Shields, Clear Anti-Fog Lens	PR

Radians Goggles, Indirect Vent

Radians Chemical Splash Safety Goggle is an indirect vent goggle which provides protection against chemical splashes. Fits over most prescription eyewear for complete protection.

SKU	Description	UOM
RADGG0111ID	Radians Goggles, Indirect Vent, Clear Anti-Fog Lens	PR

Faceshield Bracket with Ratcheting Headgear

Fully adjustable crown for a superior fit and floating suspension to accept light impact in case of accidental blows. Take-up knob allows the size to be changed quickly and easily for maximum comfort. Knobs are simple to adjust for light or heavy friction. Pivoting guard allows window to kick up when not in use. Also features a large, washable and replaceable sweatband. Large guard provides excellent protection from sparks, particles, etc. Three locking cams hold window more securely under impact, plus simplifies attachment or removal. Meets ANSI Z87.1 Specifications

SKU	Description	UOM
CLV103	Faceshield Bracket with Ratcheting Headgear	EA

Visor Bracket, for Hard Caps

Headgear Bracket. Aluminum Material. 5 system cam lock for added impact resistance. 102 Bracket accepts most manufacturers' hard hat and universally punched windows. Meets or Exceeds ANSI Z87.1-1989 Safety Standard.

SKU	Description	UOM
CLV102	Visor Bracket, for Hard Caps	EA

Faceshield Bracket for Full Brim Hard Hat

Retention band allows this adapter to quickly and easily attach to standard hard hats to provide a mount for faceshield visors. Visors not included.

SKU	Description	UOM
MSS27906	Faceshield Bracket for Full Brim Hard Hat	EA

Replacement Visor, PETG, Basic Impact

PETG visors are 8" x 15" x 0.4" and fit standard face shields frames. Face shields are not to be used for primary eye protection. Meets ANSI Z87.1 1989.

SKU	Description	UOM
MSS22699	Replacement Visor, PETG, Basic Impact	EA

Replacement Visor, Mesh Screen, 8" x 15"

Mesh Screens: For use in high heat conditions or applications that require increased ventilation. Visibility is reduced. 8" x 15" x 24 (20 x 38 cm) black.

SKU	Description	UOM
BUL8S24	Replacement Visor, Mesh Screen, 8" x 15"	EA

Ironman Lite Harness, Back D-Ring

The Reliance Ironman™ Lite series is ideal for use in heavy construction, maintenance, and in harsh environments. It utilizes Polyester TattleTale® webbing, which has an interior ply of contrasting black “strength” yarns that increase webbing strength to 7,000 lbs (31kN) and instantly reveals cuts or abrasions.

SKU	Description	UOM
REL800000-A	Ironman Lite Harness, Back D-Ring, Standard	EA
REL800100-A	Ironman Lite Harness, Back D-Ring, Small	EA

Flotation Device, Class 5, with Slotted Back

The closed-cell flotation foam will not absorb water if cut or punctured. The tough, flexible vinyl coating resists caustics, acids, UV lights, hydrocarbons, mildew, fading, drilling mud, tears and abrasions: it is easy to clean with soap and water - a benefit that fabric-covered devices cannot claim.
